during the first seven months of its working. The factory was originally installed with a capacity of 60 candies of jaggery for daily melt ; but with certain additions, alterations and improvements, the capacity has been recently raised to a daily melt of 120 candies. The real difficulty in the matter of working the factory at present is the scarcity of supply of jaggery. The factory is now indenting upon the neighbouring British districts for the supply of jaggery, as the Travancore supply has been found to be insufficient for the daily requirements of the factory. We have a large number of palmyrah trees in South Travancore ; but all of them are not tapped for want of climbers. The price of one candy of palmyrah jaggery stood at Rs 18 an year ago ; but is now quoted at Rs 30 per candy and the present depression has not affected the price of jaggery in any way. There appears to be ample scope for development in this direction, as the manufacture of palmyrah jaggery has been found to be a paying concern. However, on account of the scarcity of palmyrah jaggery, experiments are being conducted by Mr. Chari in the Munro Island, Quilon taluk, to ascertain whether cocoanut jaggery of sufficient refining value could be produced out of sweet toddy on a commercial scale. If the experiment proves completely successful, as is expected, it is bound to be of immense advantage to the factory and to the cocoanut estate owners in general.

42. *Loans made by Government.*—An allotment of Rs 3·50 lakhs has been provided in the next year's budget for the grant of loans under the Land Improvement and Agricultural Loans Regulation, including Rs 1 lakh for the grant of special loans to the Punja cultivators in Kuttanad.
